

R7 Cap/Base

M-Type Infrared heat lamp

Type	L (mm)	W (mm)	Wattage	Voltage	Colour	Finish
H1142201000	114	114	1000	220	Clear	R7

◦ ADVANTAGES ◦

- High Efficiency:
Up to 95% of Energy Converted to IR Radiation
- Long Life:
Typically Greater Than 5,000 Hours
- Fast Response:
Typically < 1 Sec. to Reach 90% Output
- Output Maintenance:
Typically <10% Drop in Output Over Life
- Custom Lamp Designs Available
- Small Production Runs Possible

◦ APPLICATION ◦

Mainly used for infrared lamp tubes with reflective layer (heating), SMT industry professional lamp tubes (heating), color steel plate production line lamp tubes (heating), glass coating drying lamp tubes (heating), automotive paint lamp tubes (heating), crystallizer lamp tubes, vacuum molding machine lamp tubes, heat shrink packaging machine lamp tubes, heater lamp tubes, food baking furnace lamp tubes, halogen lamp tubes, chicken oven lamp tubes, and incubator lamp tubes, Printing and dyeing infrared sampling machine lamp tubes, pre shrinking machine lamp tubes, base drying machine lamp tubes, paint room lamp tubes, printing fast heating and drying lamp tubes, etc

The most common lengths and wattages are listed, please tell us should you require a different length.
